Welcome!

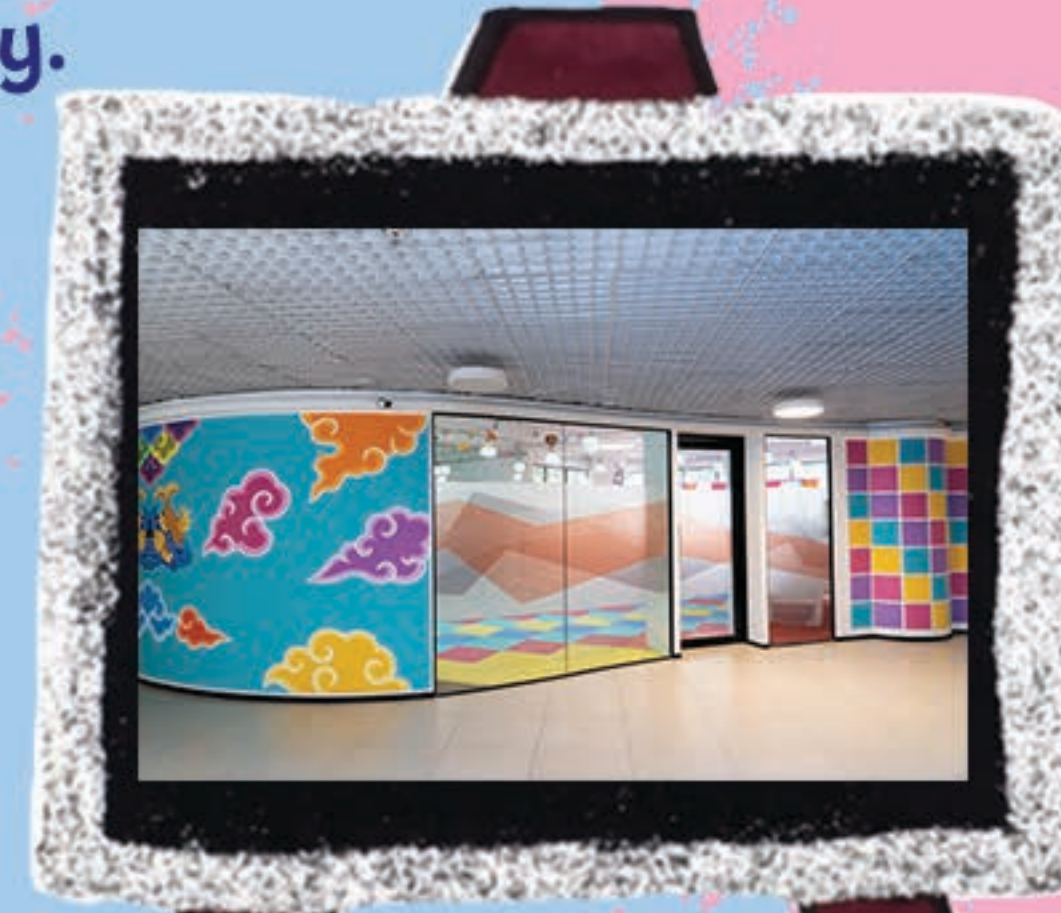

The Arcadia of My School ITALY as a Daycare, Preschool, Kindergarten, and After School Activity Centre stems from the desire to offer children a new gathering space for research & discovery. We are the **ONLY** Early Childhood Education and Care Centre in the world to use Neuroscience Study Technology for developing the **WHOLE CHILD.**

Smile Always

Prasad Garapati & Dr Aperna Volluru
Founders

Learning Environment Driven by a Scientific Approach

My School ITALY is the only preschool with neuroscience-based pedagogy and advanced child-friendly learning infrastructure in response to the realities of the modern-day world. Natural light enters each classroom, with purpose-built furniture and tools to stimulate learning activities and various types of interaction. We provide endless opportunities to learn through imagination, creativity, and play.

Flexible and Experiential Curriculum Crafted to Deliver with Imagination and Heart!

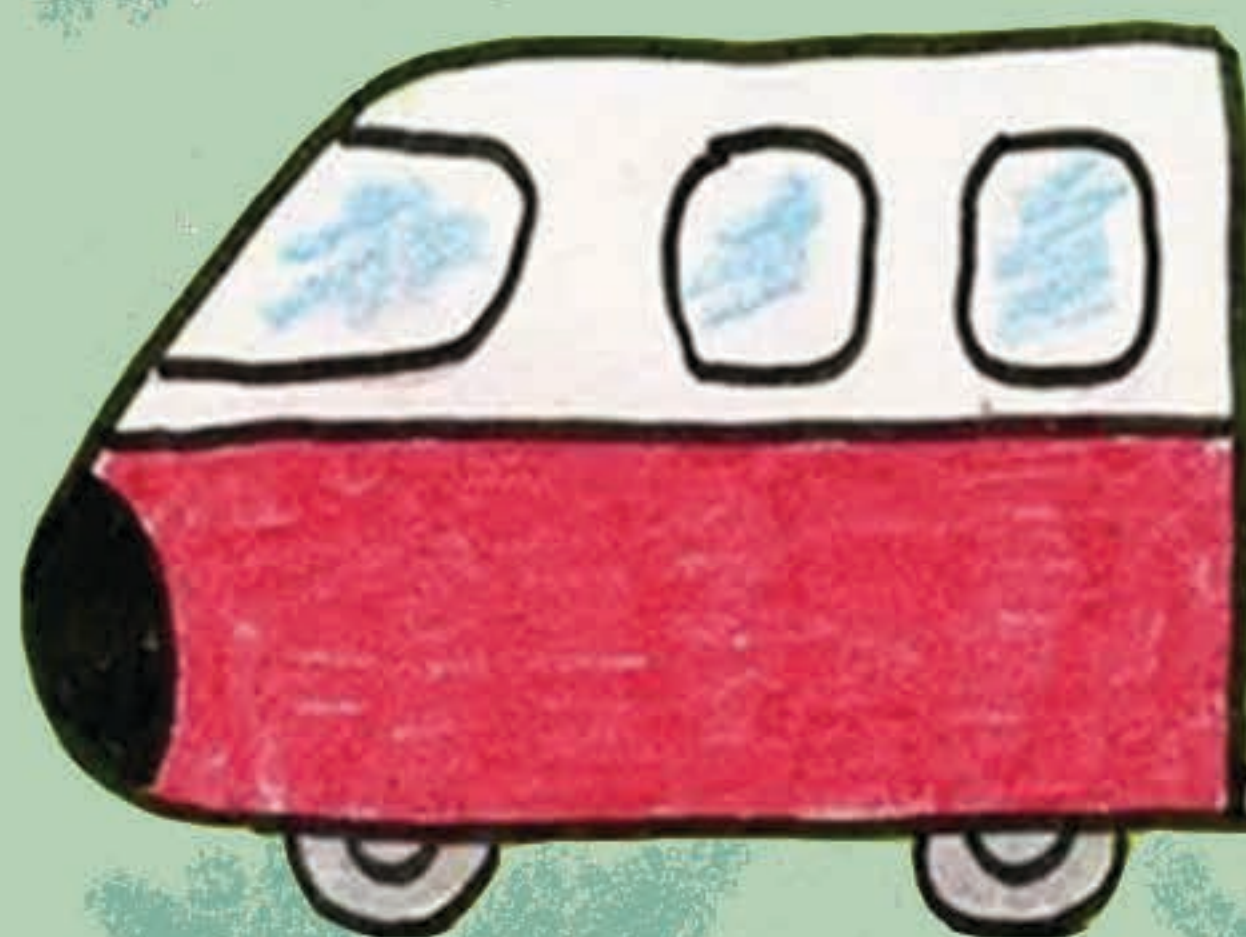

In all My School ITALY centres of Early Childhood Care & Education (ECCE), Neuroscience Tools such as Mind Mapping, Neurobics, Super Memory Power, Basic Concentration, Quantum Reading, Vedic Arithmetic, Vedic Science, Mega Memory Power, etc. are beautifully blended into the curriculum. All our resources and materials are carefully crafted to provide an attractive yet practical play and learning space to ignite a deeper level of interaction and engagement.

My School Italy Transforms Children into Great Communicators!

We offer an outdoor and an indoor learning environment with a special focus on pre-math, pre-literacy, life skills, and language skills. We engage students in group as well as individual activities to enhance their communication and expression skills.

Let the Imagination go Beyond Boundaries!

Learning is a lifelong process. We reject myopic, self-serving pedagogies that focus exclusively on maximising short-term academic grades. We equip each of our pupils in a way that they thrive in the long run. Fantasy, imagination, and animation help children learn how to navigate life. We learn from the characters in stories, even as adults. Albert Einstein said, "If you want your children to be intelligent, read them fairy tales. If you want them to be more intelligent, read them more fairy tales."

Our Daycare!

We at My School ITALY believe that every child is the fruit and bearer of a story and therefore his/her inclusion in the Daycare is taught in continuity with the family context to favour the child's holistic development. Parents are made the participants in the child's day through the story, the daycare sheets, the photographs, and the exhibition of the child's work. In order to respond more and more concretely to the need of the parents, we provide Live CCTV Feed, Biometric Security Systems, Learning and Management Systems, and Child safe, hygienic, and friendly Ambience. Our Nap Rooms and diaper Change Stations give extra mileage to our Daycare Facility.

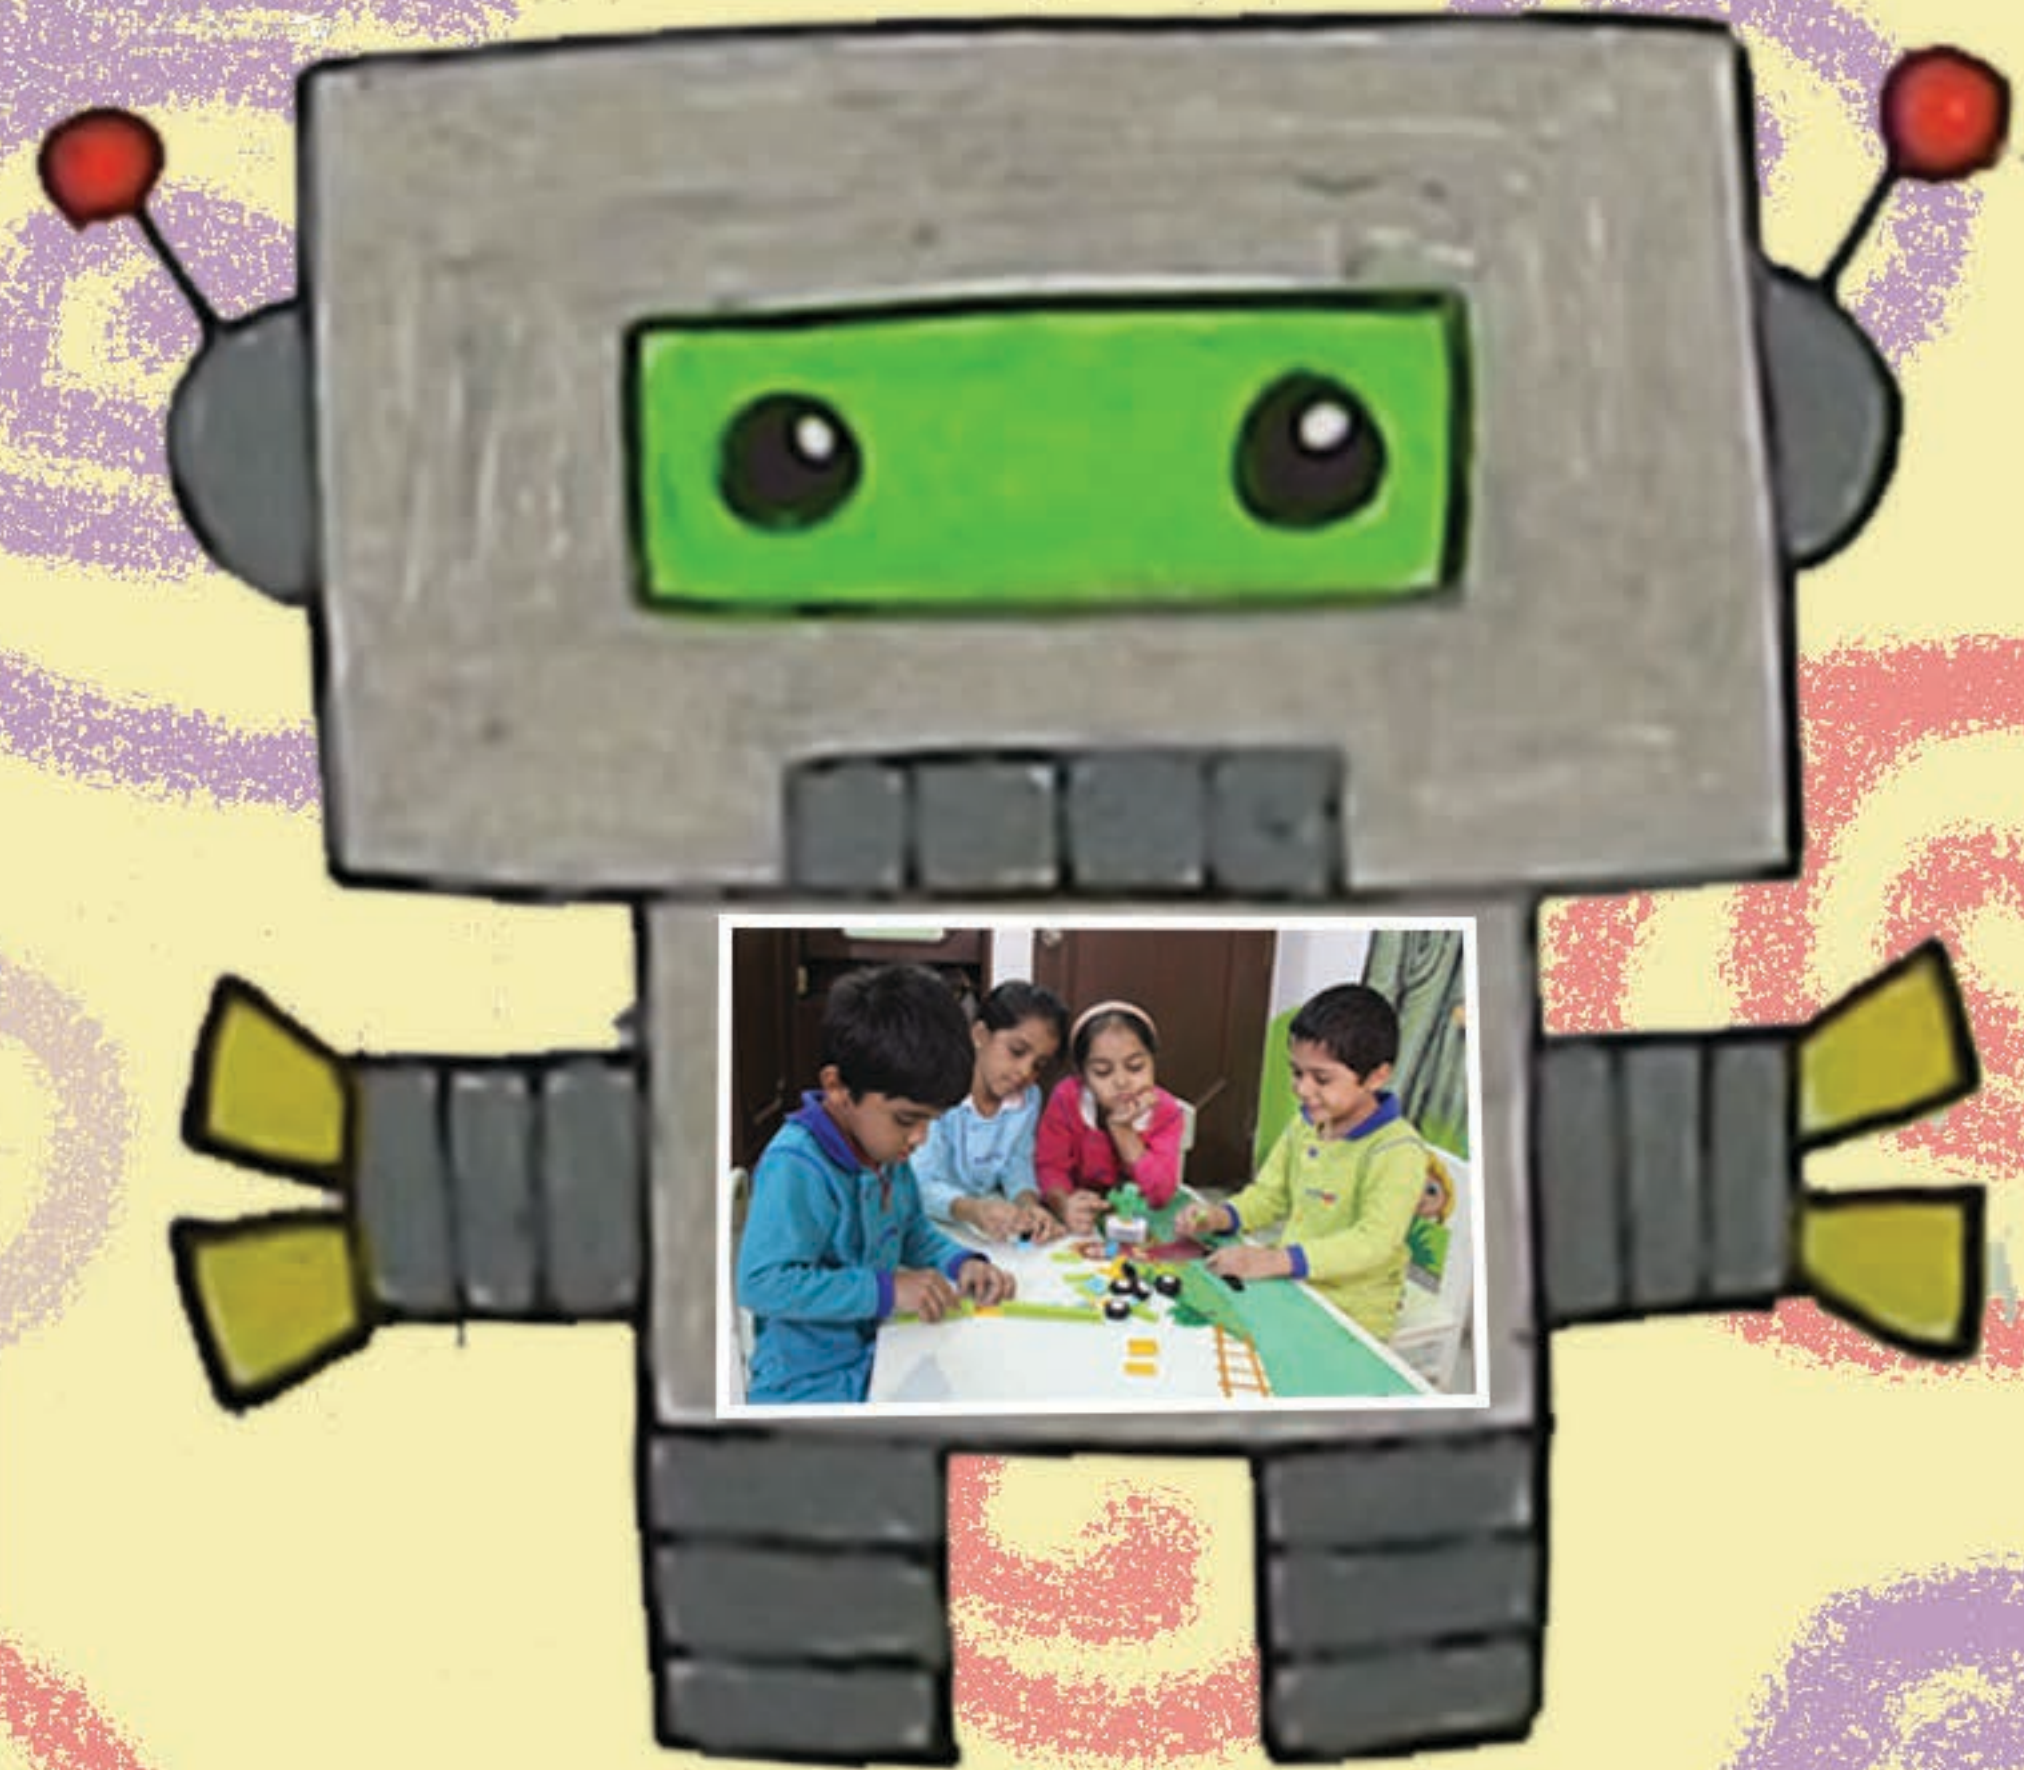

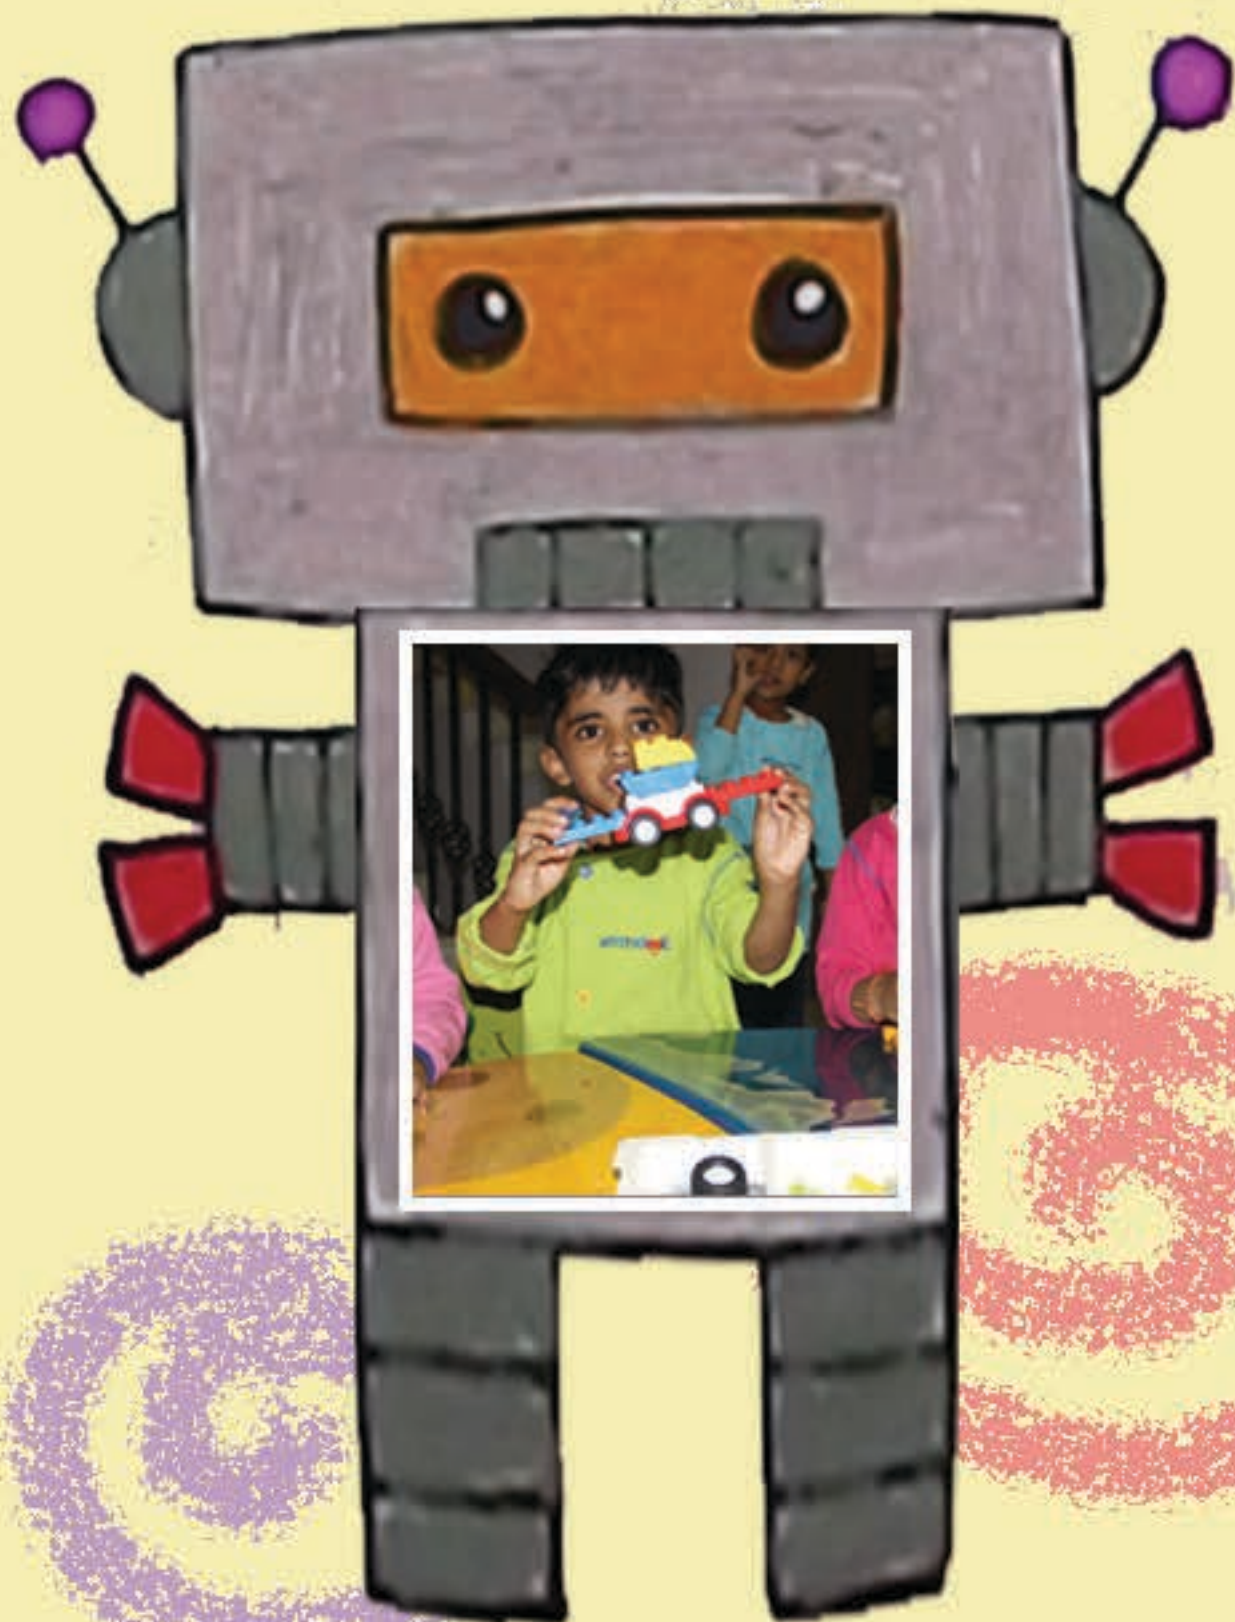

Gymnastics for Young Ones!

We at My School ITALY believe that the Gross Motor Skills of a child need to be developed in a very organised way and the time spent on these skills should encourage the child to participate in International Events. Hence, we have introduced Gymnastics into our Preschool Curriculum, where children are trained from the age of 1.5 years. We are the only Preschool in INDIA to introduce gymnastics from the age of 1.5 years. And our International Standards of Gymnastic Curriculum for kids provide the foundation for the Olympics and other International Sports Events.

Robotics in Our Centres

Integrating robotics into Early Childhood Education helps close gender SES-based gaps in the achievement related to STEM fields. For children in Kindergarten, robotics can introduce STEM concepts in a playful way, thereby encouraging them to be excited about further exploration in Science, Technology, Engineering, and Math!

Together We Can Achieve Great Things

According to a Research Study, children learn effortlessly when families and educators collaborate and act together. We engage all parents as our partners-in-progress in the transformational journey of children. Here you find a caring environment that builds positive and meaningful relationships with parents. Let's make a great future for them.

Our Software

It has both Learning Management System (LMS) and School Management System (SMS). All our academic content is digitalised and is accessible to parents for revising lessons with their children at home. It includes Rhymes, Stories, Activities to develop Sensory & Motor skills, Cognitive skills, Speech & Language skills, Reading & Listening skills, Social & Emotional Skills, Basic Literacy Skills, etc., for children in the age group of 1.5 to 8 years.

Key Features of SMS

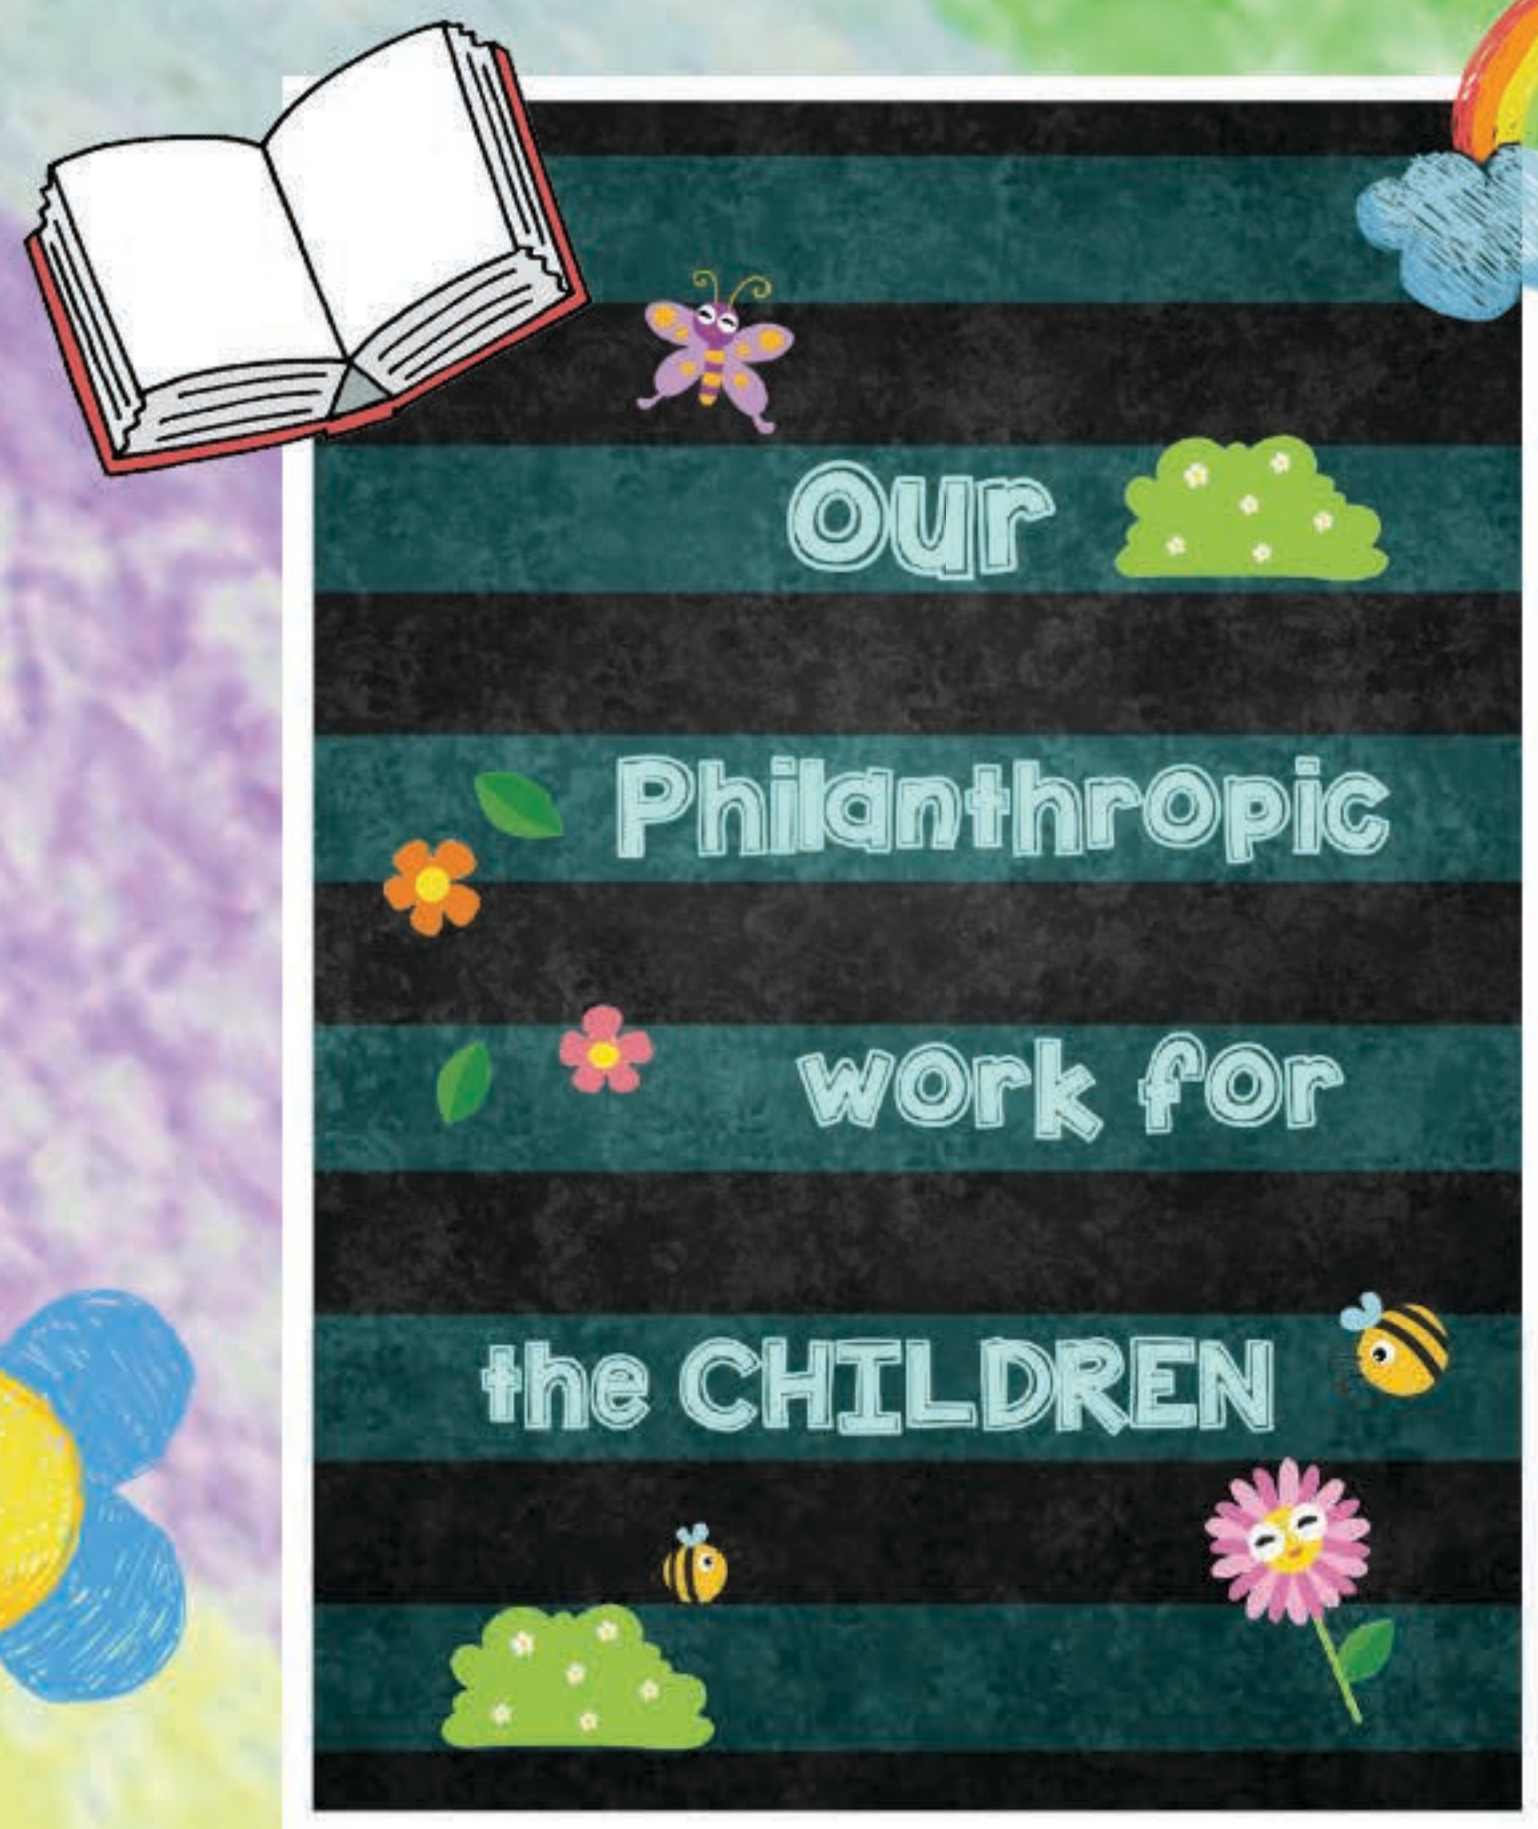

- ▲ Weekly Curriculum
- ▲ Attendance
- ▲ Performance
- ▲ Diary
- ▲ Communication with School

Our Mission: Education Excellence Everywhere

Taking My School ITALY Early Childhood Education to Buddhist Monastries & Schools located in the Himalayan mountains.

Taking My School ITALY Language and Skill Development Programs to Tribal Children living in inaccessible terrains.

Our Vision: Foresight Education

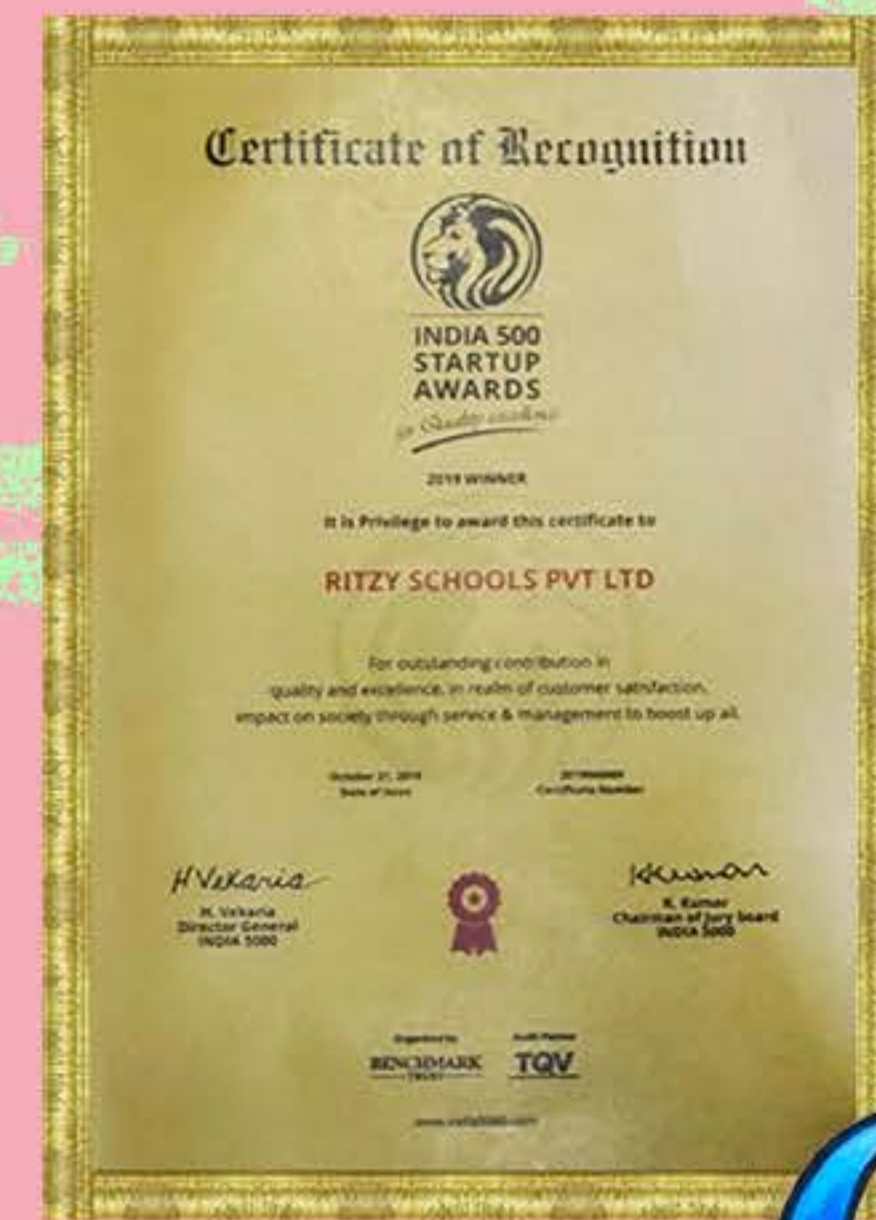

Entrepreneurial Development & Training Program

Teachers Training & Upskilling Program

Our Goal: Future-Ready Kids and Satisfied Parents

International affiliations, world-class learning facilities, trained teachers, feature-rich curriculum, friendly ambiance, national and international accolades, and knowledge-driven training methodologies are key driving factors at My School ITALY. We believe our curriculum should reflect the children, families, and wider community within which we are located. At My School ITALY we are continually developing our pedagogical approach in response to the realities of the modern-day world. Our Neuroscientific approach to the Early Years Foundation Stage curriculum creates opportunities for teachers to foster open-ended, child-led activities which harness the child's intrinsic curiosities.

Hi! My Name is Mr Ritzy. I am The Mascot.

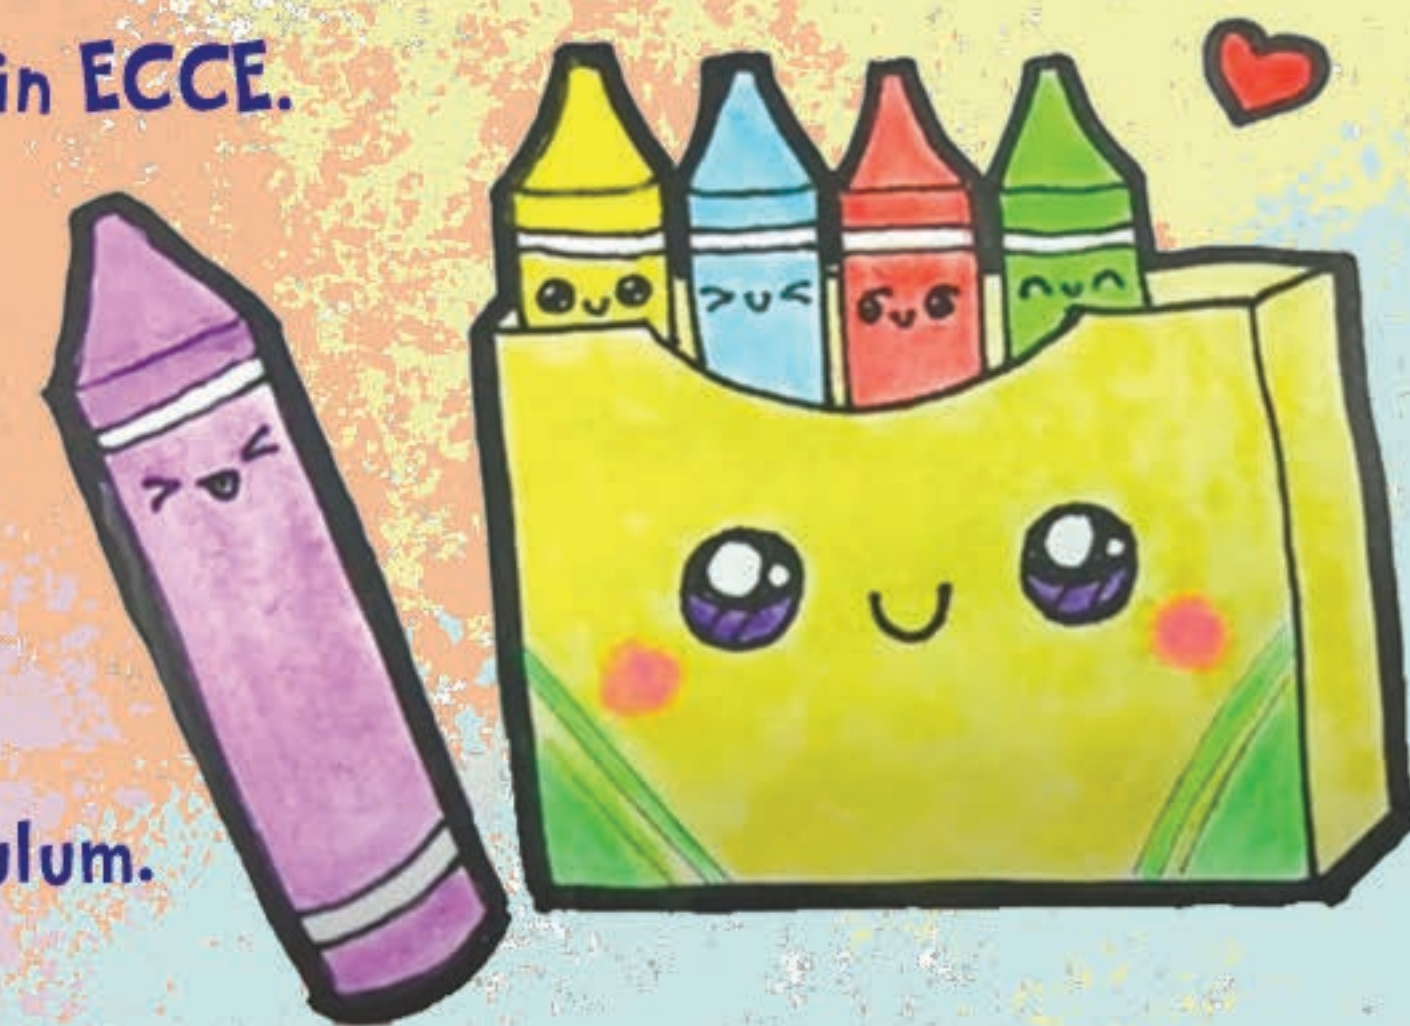

I am a beaver. Beavers are known for their natural trait of building dams on rivers and streams. Beavers also build canals to float building materials that are difficult to haul over land. The beavers are known for their industriousness and their architectural skills. They are also called Nature's Engineers. The English verb, to beaver, means to work hard and constantly. We at My School ITALY want everyone in our family to be like a beaver. I, Mr Ritzy represent our incessant endeavours to contribute our best to Early Childhood Education & Care.

Our USPS!

- ③ Our Neuroscientific Teaching Tool 'Decant' and our Assessment System 'Milestones' are the **FIRST** of their kind in the world of Early Childhood Care and Education (ECCE).
- ③ We are the **FIRST** Preschool in the **WORLD** to introduce Neuro Linguistic Program (NLP) in ECCE.
- ③ We are **WORLD'S FIRST** chain of bagless and stress-free Preschools.
- ③ We are a truly European Preschool where the teaching Staff has undergone 250 hours of Cambridge Certified Teachers Training.
- ③ Our K-2 children are groomed to take Cambridge Young Learners English Examination.
- ③ First Preschool in Indian History to introduce Robotics and Gymnastics into our Curriculum.
- ③ Live CCTV Feed for Parents.
- ③ Biometrics-High-End Security Systems.
- ③ Child Safe and Extremely Hygienic Ambience.
- ③ Frozen Fee Structure.
- ③ 12 hours a day facility of Day Care for working parents.
- ③ Children from the age of 9 months to 14 years can avail of our professional caregiving services with International Standards.

East West Ethos

Our Kindergarten team is professional, competent, and creative.

They are trained to construct lessons using the three main domains of learning:

- © Cognitive (thinking),
- © Affective (emotion/feeling),
- © Psychomotor (physical).

As you get to know more about us, you will see, we are more than a school.

It's the very essence of what we do. Our philosophy, our people, our commitment and our resources are all focused on helping us to give the children an excellent start in life, exposing them to the best of both oriental and occidental ethos.

When this is achieved, success is assured.
